EDUCATION

University of Minnesota, 2015-Present

- Ph.D candidate, Physics
- Advisor: Prof. Clem Pryke

The Chinese University of Hong Kong, MPhil, Physics, 2013

- Advisors: Prof. Ming Chung Chu and Dr. Lap Ming Lin

The Chinese University of Hong Kong, B.Sc., Physics, 2011

- with Honours, First Class
- Minor: Mathematics

AWARDS

Antarctica Service Medal, 2021

RESEARCH

Searching for Inflation Signals with the BICEP/Keck Telescopes

- Installed and calibrated the Keck Array 270 GHz receiver at the Amundsen-Scott South Pole Station in Nov 2017-Jan 2018.
- Demolished the Keck Array mount, built the BICEP Array mount, installed the BICEP Array 30/40 GHz receiver and completed the first light CMB map analysis during the entire summer season campaign at the Amundsen-Scott South Pole Station in Nov 2019-Feb 2020.
- Led the BICEP/Keck weekly data reduction campaign in 2019-2022.
- Completed the analysis of CMB data from Keck Array and BICEP3 2016-2018 observing seasons for the r constraint. The result is published in the “BK18” paper.
- Conducted test runs on the BICEP Array 150 GHz detector modules and receiver as a visiting student researcher at the California Institute of Technology in Jul 2021-Sep 2021.
- Developing new subsystems, particularly the telescope mount and the cryostat, for BICEP Array.
- Rewriting the analysis pipeline for BICEP Array.
- Leading the “pipeline A” analysis of the BK18+SPT-3G delensing studies.
- Conducting foreground studies for CMB-S4.

Impacts of Relic Neutrino Degeneracies on Cosmic Microwave Background

- Investigated the impacts of neutrino degeneracies in CMB data fitting, particularly for the constraint of the Hubble parameter H_0 and the spectral index n_s .
