## EDUCATION

University of Minnesota, 2015-Present

- Ph.D candidate, Physics
- Advisor: Prof. Clem Pryke

The Chinese University of Hong Kong, MPhil, Physics, 2013

- Advisors: Prof. Ming Chung Chu and Dr. Lap Ming Lin
- Thesis: Constraints on Tensor-to-scalar Ratio from Planck Measurement

The Chinese University of Hong Kong, B.Sc., Physics, 2011

- with Honours, First Class
- Minor: Mathematics

## AWARDS

Antarctica Service Medal, 2021

## RESEARCH

### **Probing Inflation from Measurements of B-mode Polarization in Cosmic Microwave Background (CMB)**

- BICEP/Keck Collaboration member (2015-present), Caltech visiting student researcher (Jul 2021-Sep 2021). Using small aperture telescopes to measure degree-scale B-modes at Amundsen-Scott South Pole Station.
- *Analysis work*: data reduction lead (2019-2022); completed the “BK18” analysis (science results with new data from 2016-2018) - the strongest constraint of the tensor-to-scalar ratio  $r$  to date.
- *Instrument work*: key member of the BICEP Array mount and cryostat development team.
- *Deployment work*: deployed Keck Array 270 GHz receiver in 2018; deployed BICEP Array mount and 30/40 GHz receiver (first light) in 2020.
- *Ongoing research*: rewriting the pipeline for BICEP Array; developing a pipeline for BICEP/Keck+South Pole Telescope delensing analysis; acting as an analysis pipeline consultant.

### **Searching for Primordial Gravitational Waves with CMB-S4 experiment**

- Conducting foreground studies for large-scale B-mode observation strategy.

### **Investigating Impacts of Relic Neutrino Degeneracies on CMB**

- Studied the impacts of neutrino degeneracies in CMB data fitting, particularly for the constraint of Hubble parameter  $H_0$  and spectral index  $n_s$ .
