POSITIONS HELD California Institute of Technology, 2023–Present

- Postdoctoral Scholar in Physics

EDUCATION University of Minnesota, Ph.D., Physics, 2023

- Advisor: Prof. Clement Pryke
- Thesis: Constraining Inflation Models with the BICEP/Keck B-mode Experiment

The Chinese University of Hong Kong, MPhil, Physics, 2013

- Advisors: Prof. Ming Chung Chu and Dr. Lap Ming Lin
- Thesis: Constraints on Tensor-to-scalar Ratio from Planck Measurement

The Chinese University of Hong Kong, B.Sc., Physics, 2011

- with Honours, First Class
- Minor: Mathematics

AWARDS Antarctica Service Medal, 2021

RESEARCH **Probing Inflation from Measurements of B-mode Polarization in Cosmic Microwave Background (CMB)**

- BICEP/Keck Collaboration member (2015–Present), Caltech visiting student researcher (Jul 2021–Sep 2021). Using small aperture telescopes to measure degree-scale B-modes at Amundsen-Scott South Pole Station.
- *Analysis work*: data reduction lead (2019–2022); rewrote the pipeline for BICEP Array; completed the “BK18” analysis (science results with new data from 2016–2018) — the strongest constraint to date on the tensor-to-scalar ratio r .
- *Instrument work*: key member of the BICEP Array mount and cryostat development team.
- *Deployment work*: deployed Keck Array 270 GHz receiver in 2017/18; deployed BICEP Array mount and 30/40 GHz receiver (first light) in 2019/20.
- *Ongoing research*: developing a pipeline for BICEP/Keck+South Pole Telescope delensing analysis; acting as an analysis pipeline consultant.

Searching for Primordial Gravitational Waves with CMB-S4 experiment

- CMB-S4 Collaboration member (2021–Present). Conducting foreground studies for large-scale B-mode observation strategy.

Investigating Impacts of Relic Neutrino Degeneracies on CMB

- Studied the impacts of neutrino degeneracies in CMB data fitting, particularly for the constraint of Hubble parameter H_0 and spectral index n_s .
